The solicitor suggested the following for B.5 “Accessory Dwelling Units shall meet all requirements of the Principal Structure or the Garage, Detached. If Garage, Detached is also an ADU and is located within 15 feet of a property line, no windows are permitted above the ground floor directly facing an adjacent property. He also suggested capitalizing the first letter of the word Lot and Lots throughout 315B. Discussion took place. Mr. Brown suggested going through the table on page 45. Council agreed that the Deck area was a bit confusing the way it is currently written. Ms. Berardi noted there is no definition for wall. Other Council members felt the wall and fence are interchangeable. Mr. Brown suggested defining the wall as a non-opaque fence. Mr. Stiller added that Council says see fence, when defining a wall. Heavy discussion took place over the table on page 45 on the height of Garages. Council ended the night completing the table in article 4 on page 49.
